IntelliAdmin USB History Viewer

What's New in the IntelliAdmin USB History Viewer?

IntelliAdmin USB History Viewer is a very lightweight application designed to help users view a history with all USB flash drives that have been connected to a computer. Because of its power and simple layout, IntelliAdmin USB History Viewer is extremely easy to use and does not require any previous knowledge of software installation to perform its operations. IntelliAdmin USB History Viewer is a USB flash drive-aware software solution, and therefore it won't leave any traces in the Windows Registry. Moreover, the tool doesn't require installation on any computer since it doesn't use any sort of software to be successfully carried out. Once it is set up and you connect a USB flash drive to your system, IntelliAdmin USB History Viewer will display a list of all USB devices that have been connected to the target PC. You can sort the list by any column, such as ID or mount date, time, or by clicking on the column you want to be sorted by. From this list, you can choose to view the information about the current USB drive that is being connected to the computer, or select a previously connected one. By doing so, you will be able to view the relevant data about this device, such as ID, mount date and time, and the number of read and write operations it has been used for. In case the current USB device is not connected to your system, IntelliAdmin USB History Viewer will show a notification and leave the interface. You can use this information in order to review and take appropriate action with the respective USB flash drive. ** The product names, logos, brands, and other trademarks or logos on this site are the property of their respective owners.
