Also, you can cover it with a layer and insert a picture, you'll still have the ability to change the text later. Photoshop is, in a word, the industry standard. Designers, artists, cinematographers, editors, and photographers depend on Photoshop to produce incredible work. Professionals and hobbyists rely on Photoshop for all kinds of photo retouching and compositing. Great tools make great work. The good news is that you can apply the same tools and tricks you picked up from other Adobe software to increase the work you do in Photoshop. There are plenty of

tutorials from Photoshop, so there's no reason you can't learn tricks that you can apply elsewhere.
